## Summary

---

Backend Developer with over a year of hands-on experience developing ERP systems, e-commerce platforms, and scalable web applications using Python, Django, and Django REST Framework. Experienced in designing and integrating secure REST APIs, database-driven applications, authentication and authorization, and reliable backend services for business applications. Recently expanded into frontend development while contributing to a large-scale ERP application using React.js, Next.js, TypeScript, and PrimeReact, developing inventory and financial reporting interfaces, API integrations, data-driven dashboards, and performance-focused UI improvements. Experienced in working across ERP and e-commerce applications to build maintainable, scalable, and business-focused solutions across the backend and frontend.

## Education

---

### APJ Abdul Kalam Technological University

Aug 2023 – May 2025

Master of Computer Application (GPA: 7.67 / 10.00)

Malappuram, Kerala

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming (Java), Software Engineering, Computer Networks, Artificial Intelligence, Web Technologies, Machine Learning, Data Analytics

### G-Tech

Aug 2022 – Mar 2023

Python Django Full Stack Development (GRADE: A+)

Pattambi, Kerala

- **Relevant Coursework:** Python Django Full Stack Development, HTML5, JavaScript, Bootstrap, CSS, MYSQL

### University of Calicut

Jul 2019 – May 2022

Bachelor of Commerce (GPA: 5.90 / 10.00)

Malappuram, Kerala

## Experience

---

### Exouzia

Sep 2025 – Present

Python Django Backend Developer

Pattambi, Kerala

- Contributed to the development of ERP and e-commerce applications using Python, Django, Django REST Framework, and PostgreSQL within an Agile development environment.
- Designed and maintained backend modules for user management, inventory, product management, order processing, and role-based access control (RBAC).
- Developed RESTful APIs to support communication between frontend applications and backend services, ensuring reliable data flow across ERP and e-commerce workflows.
- Worked on e-commerce functionality including product management, inventory workflows, order processing, and Razorpay payment gateway integration.
- Recently contributed to the frontend development of a large-scale ERP application using React.js, Next.js, TypeScript, and PrimeReact, working on inventory, sales, and financial reporting modules.
- Developed data-driven frontend interfaces with filtering, pagination, sorting, date-range selection, KPI summaries, stock calculations, and financial reporting views, while integrating them with Django REST APIs.
- Diagnosed and resolved frontend and backend issues related to API responses, data handling, inventory workflows, and user interface behavior, and collaborated effectively with frontend and QA teams to deliver well-integrated, production-ready features.

### Regional Technologies

Aug 2024 – May 2025

Software Developer Intern

Kozhikode, Kerala

- Developed and delivered projects following Agile methodology, utilizing Python and Django to build robust and scalable web applications.
- Designed and deployed deep learning solutions using CNN, YOLO, and suspicious activity detection algorithms for real-time analytics and security applications.
- Implemented advanced features such as interactive maps, QR code generation and scanning, and Razorpay payment gateway integration.

## Projects

---

### **PyERP (ERP & E-commerce Platform)** | *Tech Stack: Python, Django, React.js, Next.js, TypeScript, PrimeReact, PostgreSQL*

- Contributed to the development of an enterprise ERP and e-commerce platform supporting business operations including inventory, sales, purchasing, accounting, and user management.
- Developed and maintained backend functionality using **Python, Django, and Django REST Framework**, including REST APIs, product management, inventory workflows, order processing, and role-based access control.
- Contributed to the React-based ERP frontend using **React.js, Next.js, TypeScript, and PrimeReact**, developing inventory, stock, sales, and financial reporting interfaces.
- Built data-driven reporting views with **KPI summaries, filtering, pagination, sorting, date-range selection, stock calculations, ledger balances, and batch-wise inventory tracking**.
- Integrated frontend components with Django REST APIs and implemented asynchronous data fetching, client-side caching, and data normalization to improve reliability and user experience.
- Integrated **Razorpay** payment processing and supported e-commerce workflows including product management, inventory, and order processing.

### **Home360** | *Tech Stack: Python, Django, CNN, YOLO, Suspicious Activity Detection*

- Built a deep learning-based security system capable of detecting unknown persons, animals, weapons, and fire in real time.
- Implemented advanced computer vision models including **CNN, YOLO**, and suspicious activity detection algorithms.
- Enhanced safety and monitoring through AI-powered alerts and real-time detection.

### **TaxiFare Calculator** | *Tech Stack: Django, React.js, Razorpay, Maps API*

- Designed and deployed a Django-based web application to calculate taxi fares based on distance and vehicle type.
- Integrated **Maps API, QR code generation, and Razorpay payment gateway** for seamless booking and secure payments.
- Followed Agile methodology to ensure iterative development, timely delivery, and continuous improvement.

## Technical Skills

---

**Languages:** Python, JavaScript, TypeScript, Java, C, Shell

**Frontend:** React.js, Next.js, TypeScript, PrimeReact, HTML5, CSS3

**Backend:** Django, Django REST Framework, RESTful APIs

**Databases:** PostgreSQL, MySQL, SQLite

**Tools & Others:** Git, GitHub, GitLab, Axios, Fetch API

## Certifications

---

### **Cloud Computing**

*Issued by: IIT Kanpur – Date: 2023*

### **Python Django Full Stack Development**

*Issued by: G-Tech Computer Education– Date: 2023*

## Languages

---

- English
- Malayalam
- Tamil
